I need the producer to send a series of messages that I then need to run my Java code against. Can anyone provide an example of executing a producer in Java using karate? A: In addition to the answer from @unutbu above, you need to keep in mind that the producer needs a few properties which can be added via the Runner object: runner.addProperty("bootstrap.servers", "localhost:9092") What else is required depends on the client you are using, please see the documentation for your framework On The Millennial Woes, Has Rima Backed the Wrong 6a5afdab4c

Traveler [32|64bit]

Traveler is an accessible, Open-Source and portable package that contains the standart AMP stack (Apache + MySQL + PHP), plus the numerous tools web developers need to carry on with their development. The main goals of Traveler project are: - to make web development easier; - to make use of the development power of web, CMS and Analytics without additional changes in the underlying system; - to be an open-source project with easy contribution and forking. - most of the tools are tightly integrated with the underlying system in order to reduce the work load on the developers, - to make the whole system self-documenting and above all to make developers independent from the underlying technology. The package contains 7 websites (HTML/AMP/CSS/JAVASCRIPT/PHP) and 2 backend for JAVASCRIPT and HTML. pkglint.com lists the requirements, stability, performance, customer reviews, alternatives, and so on. pkglint.com doesn't host any files. All trademarks and copyrights are property of their respective owners. The extension 'traveler' is offered by pkglint.com, and has been downloaded from extensions.pkglint.com 84 times. Posted by pkglint.com for 1/9/2020 , and has been running since 7/8/2018 . Traveler
