

February 5, 2014 - When I hold down the volume key..., I get the message "VJB-d0ca683 bootloader (unlock mode): starting USB Fastboot boot protocol and stops there. If, then I want to be able to use my modem to access the internet. I press the power key and nothing happens. So, for the next one, I press the power key. After 1 or 2 minutes I get the message "USB device connected but not recognized. Please connect your device to your computer. I'm not sure what this means and I don't think my modem is connected to the computer. Do you know what that means? Thank you in advance.
